College of Engineering

University of Nevada, Reno

CS 426 Senior Projects in Computer Science

Project Video

March 31, 2016

Due: Monday, May 2, 8:00 pm (link by email)

Points: 50

Weight in course grade: 7%

For the Senior Projects Workshop that will be held on Friday, May 6, 2013 you have to prepare a video presenting your project. You can use screen capturing, camera video taping, or a combination of both. The video should be between 3 and 6 minutes long and for the moment it should be posted at youtube.com (later we might post the videos in different venues, e.g., the CSE Department's website). The video should include audio, i.e. your commentary and sound.

In the video you should specify this is a CS 426 Senior Project in Computer Science, developed in 2015/2016 in the Department of Computer Science and Engineering, University of Nevada, Reno. Include also the title of the project and the names of the team members.

How you structure the video is up to you, but in any case the main functions or features of the project you developed should be described. You can also present material regarding project background or related work but **make sure that you do not infringe on anyone's intellectual property rights.**

For technical support and access to resources such as video editors or libraries of songs (music) and images purchased by UNR (and available for your coursework use), please visit the **Dynamic Media Lab** in the UNR Knowledge Center (first floor, room 108D).

By the due date send to the instructor at dascalus@cse.unr.edu a link to your video.
