

**Department of Computer Science and Engineering  
College of Engineering  
University of Nevada, Reno**

**CS 426 Senior Projects**

**Project Website Set Up (P-WEB)**

February 14, 2006

**Due:** Thursday, February 23, 2006 @ 5:00 pm

**Points:** 50

**Weight in course grade:** 6%

By the due date, set up a website dedicated to your CS 426 Senior Project. As the project progresses, you are required to update the website with new material (additional related resources and, recommended, excerpts from your project's deliverables).

The grade for the project website will be decided at the end of the course, after the public Workshop of May 5, 2006. To provide continuity with next year's CS 426 course, please plan to have this website available at least one year after the end of the current semester (that is, at least until May 2007).

At this point in time, the following should be provided on your project website:

- Project title (specify this is a CS 426 Senior Project, Spring 2006, at UNR/CSE Dept.)
- Team number, name (if you decide to use one) & team members
- Instructor & external advisor(s) with their affiliation(s)
- Short project description (recommended size: between 300 and 500 words)
- Project related resources: "problem-domain" book, and pointers to at least four related websites. Note that four additional references (articles/papers) will be required by the due date of Project Specification.

To the above, you can add any other related material that you think will enhance your project's web-based presentation.
