

CS485/685 Computer Vision

Instructions for submitting project reports

1. Cover page. It should contain:

- a. Project Title
- b. Project Number
- c. Course Number
- d. Student's Name
- e. Date due
- f. Date handed in
- g. Abstract (not to exceed $\frac{1}{2}$ page)

2. Technical discussion. This section should contain the techniques used and the main equations (if any) implemented.

3. Results. Sample results generated in the assignment. Use figure captions so they can be referenced in the discussion section.

4. Discussion. A discussion of results should include major findings in terms of the project objectives, and make clear reference to any images generated.

5. Appendix. Program listings. Include listings of all programs written by the student. Standard routines and other material obtained from other sources should be acknowledged by name, but their listings should not be included.
