CS 426 Senior Projects in Computer Science

Project Website Set Up (P-WEB)

January 29, 2013

Due: Friday, February 8, 2013 @ 5:00 pm
Points: 50
Weight in course grade: 5%

By the due date, set up a website dedicated to your CS 426 Senior Project. As the project progresses, you are required to update the website with new material (i.e., additional related resources and, recommended, excerpts from your project’s deliverables).

The grade for the project website will be assigned at the end of the course, after the public Workshop of May 3, 2013. To provide continuity with next year’s CS 426 course, please have this website available at least one year after the end of the current semester (that is, at least until May 2014).

At this point in time, the following should be provided on your project website:

- Project title, with specification that this is a CS 426 Senior Project in Computer Science, Spring 2013, at UNR/CSE Department
- Team number, name (if you decide to use one) & team members
- Instructor & external advisor(s) with their affiliation(s)
- Short project description (recommended size: between 250 and 400 words)
- Project related resources: “problem-domain” book, and pointers to at least four related websites. Note that four additional references (articles/papers) will be required by the due date of Project Concept/Specification (Project Part 1).

To the above, you can add any other related material that you think will enhance your project’s online presentation.
