CS 426 Senior Projects in Computer Science

Project Website Set Up (P-WEB)

January 21, 2016

Due: Friday, February 5, 2016 @ 8:00 pm

Points: 50

Weight in course grade: 6%

By the due date, set up a website dedicated to your CS 426 Senior Project. As the project progresses, you are required to update the website with new material (e.g., additional related resources, news on project progress, and some of your project's deliverables – poster, video, maybe more).

The grade for the project website will be assigned at the end of the course, after the public Workshop (CoEN Innovation Day) in April or May 016. To provide continuity with next year's CS 426 course, if possible please have the website available at least one year after the end of the current semester.

At this point in time, the following should be provided on your project website:

- Project title, with the specification that this is a CS 426 Senior Project in Computer Science, Spring 2016, at UNR/CSE Department
- Team number, name (if you decide to use one) & team member(s)
- Instructor & external advisor(s) with their affiliation(s)
- Short project description (recommended size: between 250 and 400 words)
- Project related resources: "problem-domain" book, and pointers to at least four related websites. Note that the domain book and four additional references (articles/papers) will be required by the due date of Project Part 2.

To the above, you can add any other related material that you think will enhance your project's online presentation. Note that while the website could be fairly simple, it should still have good contents and good appearance.

Some of the 2014 project website are still available (as of January 20, 2016) at:

<http://www.cse.unr.edu/~dascalus/sp2014.html>

Specifically, project websites of Teams 02, 04, 06, 07, 09, 10, 11, and 14 are still up. Note that these examples are given only as a matter of information, and it does not mean that you have to follow them (some of these websites may have not received high grades).

By the deadline, please send the link to your project website to the instructor at dascalus@cse.unr.edu Use the subject title for the email: **CS 426 project website Team XX**.
