

Talon Blue

How to play Talon Blue:

- The object of Talon Blue is to destroy as many enemy bases as possible before being destroyed
- The game ends when the player losses his 5 life points.
- To find enemy bases follow the green compass point that hovers underneath the player ship
- When the base timer expires the enemy base will heal and teleport to a new location
- The distance to the next base is displayed with the base timer
- After killing three bases the player will advance to the next level
- The enemy base will spawn heat seeking enemy drones to try and kill the player
- The speed and maneuverability of drones will increase in each level
- Occasionally an enemy drone will drop a yellow power-up that recharges the player's shield
- Up to 3 shields can be obtained to protect the player's life points

Controls:

- Use the left analog stick to turn the ship. Pushing the stick to the right will turn the ship clockwise and pushing the stick to the left will move the ship counter clockwise.
- Use the 1 button to fire. Hold the button for auto-fire
- The shoulder buttons, 5 and 6 rotate the thrust of the ship by 90 degrees allowing the player to strafe the enemy. Pressing both shoulder buttons simultaneously will put the ship in reverse
- Optional keyboard controls mapped to q, e, a, s, d and space
